

Our new Agent in Scandinavia Crane Chem Oy, Finland

Crane Chem Oy, Helsinki, Finland
Established 30.12.08 by Hannu Kurki

Crane Chem Oy deals with chemicals for different industries. Hannu Kurki has a over 30 years experience in the chemical industry.

1981-1986 he worked for Akzo in the printing ink and masterbatch segments.

After he joined Sandoz/Clariant were he became a marketing specialist. He occupied various positions as sales manager, business unit and international key account manager.

Crane Chem Oy represents IQChem for organic pigments in the Nordic countries (Finland, Sweden, Denmark and Norway) and is also responsible for selected customers in Baltic States.

In addition, Crane Chem Oy represents CEAC/BCO Technology for Ecotint pastes for the coating industry and is also involved in the sales of plastic additives.

New Team Member in our Lab Ulyse Brigenti

We welcome Mister Ulyse Brigenti as a new member of our lab team in Witterswil. He will assist Mr. André Bender in his daily lab work.

Looking for technical information about our products?

Please refer to our Website at www.iqchem.com where we offer downloads of our technical and safety data sheets 24 hours a day.

Our new Agent in Benelux Spectrokem B.V. Netherlands

We would like to announce that Spectrokem B.V. Netherlands is our new agent for the Benelux countries. IQChem Inc. can herewith extend their product range on organic pigments to progress their international trading business in specialty chemicals and consulting activities.

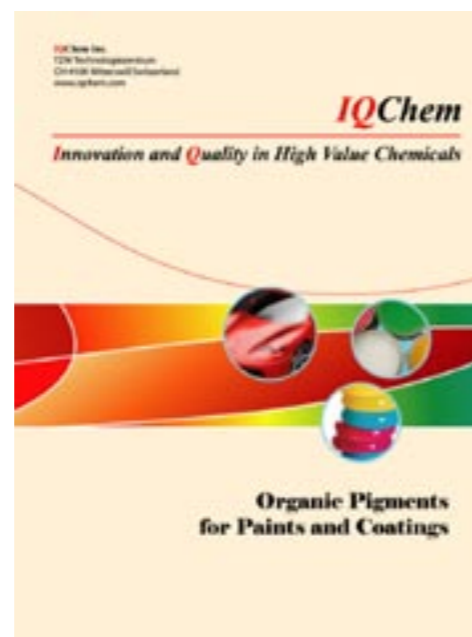

Spectrokem B.V. was established in January 2005. The company is owned and managed by Mr. Heiner Krüll, who has been involved with all pigment industries for many years. After his study in chemical production technologies he started his professional career at Hoechst AG in Frankfurt/M (now Clariant) at several technical divisions for organic pigments and preparations.

In the eighties he switched over to technical sales and marketing for Kemisk Vaerk Koege/DK and 1990 was asked to grow up the European pigment business for Sun Chemical Corp. USA as General Manager Benelux. During the last four years Spectrokem BV was involved in technical consulting and marketing in Europe and South Asian countries for Cathay Pigments China. Heiner is German and is living since 20 years in the Netherlands.

Spectrokem B.V. is also the exclusive agent in Benelux, Germany, Austria and Switzerland for BCO Ecotint and CEAC Colours Systems, Switzerland and for HERO Tinting Machines and Mixers.

We feel confident that we can steadily grow our sales and profits with the partnership of Spectrokem B.V.

Editorial

Sven Fiebrig, President

In the past months we have witnessed the deepening of the financial sector crisis, which has assumed a truly global scope. The knock-on effect on industry sectors such as construction, automotive, engineering and manufacturing is a marked downturn in customer demand, forcing many companies into temporary plant shut-downs, reduced working hours and outright layoffs. The chemical industry now is bearing the brunt of the sudden decline in customer orders. So far, only the chemical segments supplying to the pharma, agro and nutrition industries have been able to resist the marked downturn fairly well.

These are particularly challenging times for the trade business also. At IQChem we have in recent months made major efforts to broaden both our product portfolio and the customer base in an attempt to mitigate the effects of the economic crisis. We have focused on increasing our competitiveness by way of improved responsiveness and optimised customer service.

Thanks to the loyalty of existing customers and our ability to convince new customers of our offerings, we have so far been able to sustain our business. We are aware of the risks which lie ahead if the economic crisis deepens further, but we remain confident

that the high degree of flexibility which typifies a small business like IQChem will allow us to adjust swiftly to any changes in market conditions. We sincerely hope that our customers will soon see the worst of the crisis over and be able to resume the path of growth.

*Sven Fiebrig
President*

The current economic crisis will weaken the market position of the leading pigment suppliers

Dr. Fritz Brenzikofer, CEO

At the high performance pigment conference 2006 in Indianapolis I presented a paper with the provocative title

“will pigments follow the way of textile dyes?”

My conclusion was “yes, but not to such an extent as for textile dyes. Obviously I underestimated the pace of this restructuring process. Ciba does no longer exist as an independent company and Clariant is continuously restructuring and implementing cost saving measures which are reducing in my opinion their market competitiveness.

In my presentation I mentioned

often big companies are reacting to negative market trends and crisis by implementing severe cost saving programs. By doing this, a vicious circle starts, as resources for R&D and sales forces are reduced what leads to a loss of competitiveness.

I strongly believe that the four main suppliers of high performance pigments (Clariant, SUN, BASF/Ciba) lost market shares significantly during the last three years and this will in my opinion continue. The market segment “OEM/Automotives” is still dominated by the big suppliers and the current disastrous automotive crisis will affect these companies more than the smaller suppliers.

Contrary to textile dyes, I don't believe that the demand for pigments will shift so strongly from Europe/USA to Asia. The market structure and requirements for coatings, plastics and inks are different from the textile industry.

The continuing growth for pigments in Europe and the weakness of the big traditional pigment suppliers will offer a lot of additional opportunities to the other suppliers.

I am confident that also IQChem will take

advantage of this momentum. In 2008 we could increase our sales by value and volume by approx. 60 % against previous year. Of course due to the current crisis we cannot repeat such a performance in 2009 but we should be able to increase again our market share. To support this, we continue to invest in human and marketing resources.

As from January 1, we have an additional lab technician, have invested in new lab equipments and appointed two very competent marketing persons/agents for Benelux and Scandinavia (see page 4).

I would like to thank our valuable customers for the confidence in IQChem.

It is our continuous aim to offer also in future best quality pigments at competitive prices combined with a marketing service above average. The customer's benefit will also be our benefit!
